DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Josephine Chang on 29 March 2007.

The application has been amended as follows:

On page 1, line 4, "This application claims the benefit of U.S. Provisional patent application serial number 60/185,668, filed August 30, 2000," has been changed to

-- This application is a continuation of U.S. Application No. 09/ 694,079, filed October 20, 2000, which claims the benefit of U.S. Provisional Application No. 60/185,668, filed August 30, 2000, --.

Allowable Subject Matter

1. Claims 90-124 are allowed, renumbered 1-35.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 90, 98, 106, and 114, prior art of record fails to show or reasonably suggest the organization of linking masks with video programs as claimed, specifically, each mask corresponding to a particular video frame, each mask

including graphics data and an identifier to an object mapping table, wherein each entry in the object mapping table references an information data structure with information associated with the video object. Further the prior art of record fails to show or reasonably suggest, providing object data packets including the mapping table and one or more information data structures, wherein a particular one of the information data structures includes an indicia indicative that a particular video object is linked to a multiplexed program stream.

Independent claim 118 further modifies the step of overlaying, which requires determining whether the video object is visible in the video frame, and overlaying graphics in response to the determination. Prior art of record fails to show or reasonably suggest determining whether the video object is visible in the video frame in the context of the claim. Whereas, the prior art overlays graphic content based upon time information, this cannot be reasonably construed as an active step of determining whether the video object is visible as recited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
